CINI 2014 conference will create actionable health and civil society outcomes between Canada and India

June 19, 2014 - CINI 2014 will build healthier communities and enhance South Asian health while building strong links between Canada and India. The conference will be attended by leaders in academia, research, health, innovation, industry and public policy from Canada and India and will provide major health recommendations and outcomes.

The conference events will focus on health and civil society and examine four key areas, including nursing and allied health education, health-technology and the economy, chronic disease management, including innovations for sustainable health care, and the role of yoga, science and modern medicine in mental, social, and physical wellness.
